
JOURNAL OF CLINICAL EPIDEMIOLOGY

VOLUME 63, NUMBER 10, OCTOBER 2010

TABLE OF CONTENTS

Editorial

- 1051 Real world research
J. André Knottnerus, and Peter Tugwell

Commentaries

- 1053 Real-world effectiveness of new medicines should be evaluated by appropriately designed clinical trials
Nick Freemantle, and Thomas Strack
- 1059 The Catch-22 of appraisals on the quality of observational studies
R.H.H. Groenwold, and M.M. Rovers

Review Articles

- 1061 A systematic review of tools used to assess the quality of observational studies that examine incidence or prevalence and risk factors for diseases
Tatyana Shamlivan, Robert L. Kane, and Stacy Dickinson
- 1071 Unpublished data can be of value in systematic reviews of adverse effects: methodological overview
Su Golder, Yoon K. Loke, and Martin Bland

Original Articles

- 1082 Reported effects in randomized controlled trials were compared with those of nonrandomized trials in cholecystectomy
Dirk Müeller, Stefan Sauerland, Edmund A.M. Neugebauer, and Marc Immenroth
- 1091 Sampling and ethical issues in a multicenter study on health of people with intellectual disabilities
Marja Y. Veenstra, Patricia N. Walsb, Henny M.J. van Schojenstein Lantman-de Valk, Meindert J. Haveman, Christine Lineban, Mike P. Kerr, Germain Weber, Luis Salvador-Carulla, Alexandra Carmen-Cara, Bernard Azema, Serafino Buono, Arunas Germanavicius, Jan Tossebro, Tuomo Maatta, Geert van Hove, and Dasa Moravec
- 1101 Data linkage reduces loss to follow-up in an observational HIV cohort study
Teresa Hill, Loveleen Bansil, Caroline Sabin, Andrew Phillips, David Dunn, Jane Anderson, Philippa Easterbrook, Martin Fisher, Brian Gazzard, Richard Gilson, Margaret Johnson, Clifford Leen, Chloe Orkin, Achim Schwenk, John Walsb, Alan Winston, Abdel Babiker, and Valerie Delpach on behalf of the UK Collaborative HIV Cohort (UK CHIC) Study Group

JOURNAL OF CLINICAL EPIDEMIOLOGY

VOLUME 63, NUMBER 10, OCTOBER 2010

TABLE OF CONTENTS *continued*

- 1110 The likelihood of participation in clinical trials can be measured: the Clinical Research Involvement Scales
Paula M. Frew, Su-I. Hou, Marsha Davis, Kaysbin Chan, Takeia Horton, Justin Shuster, Brooke Hixson, and Carlos del Rio
- 1118 Studywise minimization: A treatment allocation method that improves balance among treatment groups and makes allocation unpredictable
Marieke Perry, Miriam Faes, Miriam F. Reelick, Marcel G.M. Olde Rikkert, and George F. Borm
- 1123 A prospective global measure, the Punum Ladder, provides more valid assessments of quality of life than a retrospective transition measure
Kenneth E. Fletcher, Cynthia T. French, Richard S. Irwin, Kristin M. Corapi, and Geoffrey R. Norman
- 1132 The quality of eight health status measures were compared for chronic opioid dependence
Bobdan Nosyk, Huiyung Sun, Daphne P. Gub, Eugenia Oviedo-Joekes, David C. Marsh, Suzanne Brissette, Martin T. Schechter, and Aslam H. Anis
- 1145 Logistic regression had superior performance compared with regression trees for predicting in-hospital mortality in patients hospitalized with heart failure
Peter C. Austin, Jack V. Tu, and Douglas S. Lee

Brief Reports

- 1156 Composite outcomes: weighting component events according to severity assisted interpretation but reduced statistical power
Uchechukwu K.A. Sampson, Chris Metcalfe, Marc A. Pfeffer, Scott D. Solomon, and Kelly H. Zou
- 1159 Cardiovascular outcome ascertainment was similar using blinded and unblinded adjudicators in a national prospective study
Gaurav Parmar, Pallavi Gbuge, Jewell H. Halanych, Ellen Funkhouser, and Monika M. Safford
